## PROJECTS

Portfolio Website                                          Link to Demo

A modern, high-performance portfolio website built with Next.js, showcasing my skills, projects, and professional journey.
A fully responsive portfolio built with Next.js 14 and the App Router for optimal performance, styled using Tailwind CSS, featuring dark/light mode with system preference detection, smooth Framer Motion animations, a functional email-integrated contact form, and a project showcase with detailed case studies.

OpenHealth                                                 Link to Demo

Open Health is a 24×7 AI-powered voice medical assistant designed to provide instant, reliable health guidance through natural conversation and enables contextual, voice-driven conversations with a GPT-powered healthcare assistant.
